DETAILED ACTION

Response to Amendment

Applicant's amendment filed July 8, 2005 has been thoroughly reviewed and considered by the examiner. Applicant's arguments, filed with the amendment of July 8, 2005, with respect to the rejection(s) of claim(s) 10-13 under 102(b) as being anticipated by either Pinkerton or Etani have been fully considered and are persuasive in view of applicant's amendments to the claims. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of the patent to Gatchet (U.S. Patent No. 1,769,428).

Claim Objections

It is noted that the recitation of "said connecting elements" in line 2 of claim 13 should read "said connecting element."

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 10, line 21, "said second position" lacks antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10, 11, 13 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Gatchet (U.S. Patent No. 1,769,428). The patent to Gatchet discloses a device for introducing substances into water, the device comprising a tubular element (4) having a radially outwardly extending flange, the device includes a connecting element (5) rotatably connected to the tubular element about the flange. A water passage (6) has threads for a threaded connection to the connecting element (5).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gatchet. It would have been an obvious reversal of parts to reverse the fluid flow direction so that the connecting element (5) is disposed about the outlet end of the tubular element.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
